

You are invited:

CLIMATE SCIENCE CONCEPTS FIT YOUR CLASSROOM

A WORKSHOP FOR COLLEGE FACULTY AND HIGH SCHOOL TEACHERS

JUNE 3, 2022 AT 11:00 A.M. EST

with **DR. JERRY A. BELL AND DR. BASSAM Z. SHAKHASHIRI**

SCIENCE IS FUN

In the Lab of Shakhashiri

www.scifun.org

This free, 2-hour interactive workshop is designed for instructors at the high school and college levels.

The only requirement is a conviction and enthusiasm for the stewardship of Earth.

It is important to understand changes in the earth's climate—how our activities cause them, and the responsibility each of us has to consider ways we might act to help lessen the disruption. This understanding can start with your students, in your classroom. This interactive workshop will demonstrate how to use climate science concepts as a context for the topics already in your courses. The workshop will also explore how incorporating climate science in your classroom extends to community effects, and to your vital role as an exemplar empowered by understanding.

In collaboration with the 2-Year College Chemistry Consortium and ChemEd Xchange.
