

Analytical Chemistry Samuel M. McElvain Seminar Series

CHARLES BAMFORTH

ANHEUSER-BUSCH PROFESSOR OF
BREWING SCIENCE

Department of Food Science
and Technology
University of California-Davis
Davis, CA

Thursday, May 10, 2012
12:15 pm Room 1315

THE MARVELOUS MOLECULES OF MARZEN, MAIBOCK AND MILD:
THE BEAUTIFUL (BIO)CHEMISTRY OF BEER

Beer is the most complex of alcoholic beverages. No surprise, then, that it is the most interesting drink scientifically and artistically. The talk will address the chemical intricacies of beer and its production - and why a beer or two each day is good for you in many ways.

Please join us for refreshments in the Shain Tower Atrium at noon.
