“Let’s
talk beer”

Wisconsin Initiative for Science Literacy (WISL)
& University Residence Halls

presents

Ethanol’s Effects: Brains, Brats, Barf and Beyond

**Tuesday, March 9, 7 pm,
Sellery Hall Main Lounge**

**Conversation leader: Kevin T. Strang,
PhD, Department of Physiology**

This conversation could be as important as sun screen as you plan for Spring Break! Dr. Strang teaches a large undergraduate physiology course for pre-allied health programs, and lectures on the physiology of alcohol in the interdisciplinary course: Alcohol, Behavior, Culture and Science 111. He is also actively involved with science education across campus. His projects beyond campus include co-authorship on the nation’s best-selling college physiology text, Vander’s Human Physiology.

Conversations in Science

You don’t have to be Einstein to enjoy
discussing how science affects your daily life.
