

6/30/22

Dear Bossam,

Your Monday, 6/27, radio interview moved me deeply. Beyond all the great things I love about you, you demonstrated how to sincerely engage people of all perspectives and ideologies. You portrayed the role science can play in discernment and evaluating theories and ideas.

What comes across was your respect for people and your love of what makes America great. And the more people listen to you, the better our chance of saving our democracy. Thank you!
